

STOP UNSAFE WORK

Territory Generation is committed to ensuring the health and safety of all employees, contractors and visitors.

We expect everyone working and visiting our sites to personally enforce our commitment to stop any work they believe to be unsafe.

If you see anything you think might be unsafe, approach the workers involved and ask to speak to the Supervisor in charge about the activity being undertaken. **You have the authority to request that work stop while this occurs.**

The work will only resume after verification and approval is given by the Supervisor. The Supervisor will determine if all identified hazards have been controlled and the risks have been removed.

If you still believe the work is unsafe, you have the authority to escalate your concerns by contacting the Supervisor's Manager, Contractors T/Gen Supervisor, WHS team or CEO where appropriate.

Territory Generation strongly encourages you to take the initiative to stop any work that you consider may be unsafe.

Tim Duignan
CEO Territory Generation
