## Undergraduate

## Vacation/Holiday Employment

### Eligibility

- Must be a current full time University student
- Be studying at an Australian recognised University
- Studying a discipline relevant to the requirements of Territory Generation
- Be in a minimum of their 2<sup>nd</sup> year of study
- Be eligible to work in Australia for the duration of the program (appropriate working visa)

Territory Generation offers students studying university degrees the option of completing paid short term work placements during mid semester and end of year university breaks. These opportunities offer students the ability to:

- Develop skills and knowledge within a power generation environment.
- Gain real life experience and industry knowledge in a professional working environment.
- Apply the methods and theories learned through university to real life situations in a controlled environment.
- Be better prepared for the progression from the university environment to the Graduate program upon completion of their degree.
- Build networks within the industry.

Students may be offered placements throughout the Territory including Darwin, Katherine, Alice Springs, Tennant Creek and Yulara.

### Recruitment Information

#### Intakes occur:

- Mid-Year – June/July – 4 week mid-year break
- End of Year Break – November to February - 4 month end of year break

All opportunities are advertised via the [Territory Generation website](https://www.territorygeneration.com.au).

#### Salary Conditions:

Undergraduates are paid in accordance to the Territory Generation Enterprise Agreement. Level of pay is dependent on which year the student is currently studying in their degree.
