

Territory Generation Procurement Activity Plan 2021/2022

The Procurement Activity Plan (PAP) includes all anticipated tender opportunities over the 2021/2022 period. Procurement activities forecast for the next 12 months are more likely to eventuate than those planned procurement activities identified in the outer years.

Procurement Capability and Capacity

The PAP clearly defines the expectations around staffing, enabling us to better manage our resources during busy periods and strategically plan these procurement activities to achieve the best outcomes for Territory Generation.

Value for Territory

Territory Generation contributes to the development of the Northern Territory and as such encourages the procurement of goods, services and works from Territory Enterprises. Territory Generation provides all competitive Territory Enterprises with full, fair and reasonable opportunity to participate in the growth of the Northern Territory. This aligns with NT Government's policy of maximising Territory Enterprises participation in NT Government procurement.

The definition of a Territory Enterprise is a business which maintains a local office, manufacturing facility or other permanent base and employs local people.

Disclaimer

This forecast does not represent a commitment from Territory Generation to tender for any of the activities listed. All information in this document is indicative only and may change. In some instances, the procurement activities may be already underway, awarded or cancelled.
